WORK EXPERIENCE

Software Developer Intern, Lumen Technologies 06/2026 – Present
Remote

- Building and maintaining a Terraform-based Datadog monitoring framework for 18+ services, standardizing CPU, latency, traffic and DB pool alerts with reusable modules and service-specific overrides.

Research Assistant – BSS Lab, University of Massachusetts Boston 02/2025 – Present
Boston, MA
Clare Boothe Luce Fellow

- Refactoring a 3k+ line MATLAB codebase to streamline the 3D brain reconstruction pipeline, improving readability and simulation accuracy in tCS applications.
- Apply Spherical Harmonic (SPHARM) decomposition to reconstruct high-fidelity cortical surface meshes from FreeSurfer MRI outputs for both hemispheres.
- Develop algorithms to systematically vary sulcal and gyral widths across controlled factor ranges, generating reconstructed brain surfaces for downstream TMS/tDCS stimulation simulations.

EDUCATION

Bachelor of Science, Computer Science, University of Massachusetts Boston 01/2024 — 05/2027

- **Relevant Courses:** Data Structures & Algorithms, Theory of Computation, Discrete Math, Linear Algebra, Probability & Statistics, Programming in C
- **Dean’s List:** Fall 2024, Spring 2025

Certificates: [Python 3](#) – [Java](#) – [C](#) – [MongoDB](#) – [Intro to GenAI](#) – [HTML](#)

PROJECTS

Researcher, Cortical Geometry Effects on tCS Electric Field Estimate 02/2025 – Present

- Refactoring and extending a 3k+ line MATLAB pipeline using Spherical Harmonic analysis to reconstruct cortical brain surfaces from FreeSurfer MRI data.
- Systematically vary surface morphology to generate morphologically diverse head models for downstream TMS/tDCS electric field simulations.

Owner, Prettied With Paige – Business Website ([Website](#)) 03/2025

- Built a full-stack business portfolio site for a hairdresser using Next.js, React, TypeScript, and Tailwind CSS with a Supabase backend, featuring a portfolio gallery, customer reviews with ratings, and a client inquiry form.
- Implemented a password-protected admin panel for managing reviews and site content.

Owner, Elara AI ([Website](#) – [Github](#)) – 3rd Place, [MongoDB x Google Cloud Hackathon](#) 06/2025

- Built FastAPI backend (two-person team) using Vertex AI (Gemini) for symptom extraction, classification, and plant remedy generation with MongoDB Atlas and downloadable PDF outputs.
- Awarded 3rd place out of 7,000 participants, securing a \$5,000 prize.

MORE ON WEBSITE

SKILLS

Frontend	React, TypeScript, HTML, CSS, Figma
Backend	FastAPI, Go, MongoDB, SQLAlchemy, Supabase
Programming Languages	Python, C, Java, Go, MATLAB, JavaScript
Machine Learning	MediaPipe, Random Forest Classifier, OpenCV
Tools	Git, VS Code, Docker, AutoCAD, SimNibs, FreeSurfer, SCIRun
Cloud	Google Cloud (Vertex AI, Cloud Run, Cloud Storage)
